holly's backyard bees

bee incursion

We offer ***Bee Incursions*** to Kindergarten and Primary School students. These engaging and interactive sessions will stimulate all the senses! They are tailored to provide age appropriate information and allow time for the children to guide the discussion and ask lots of questions.

what's included

- Observation hive with a glass panel so that children can observe a real hive in action
- Demonstration of beekeeping suit and equipment
- Child sized suit and veil for the children to try
- Beeswax to pass around and smell
- Honey tasting

$295
per session*

For all bookings, contact Holly Hale

** Cost is $295 plus GST. Travel fees may apply for out of area bookings.*

Holly is a beekeeper from the Yarra Valley who has been captivated by bees for many years now. She is a mother of 2 young girls and is passionate about introducing children to bees in a way that they perhaps have never experienced before. This bee incursion is a unique opportunity for children to experience bees in a safe environment and fosters a new sense of appreciation and awe for bees.

themes of discussion

- What makes up a hive
- Bee lifecycle
- What is involved in beekeeping and the equipment used
- How bees help our environment and how we can help them
- Bees importance on food systems and sustainability
- How to respond or behave around bees in our natural spaces.

Bees are amazing insects that are incredibly important in our environment. We rely on the humble honeybee for the pollination services they provide for a large portion of the fruits and vegetables that we love to eat, and of course for the honey that they make.
